51 (Pages 518 to 521)

520 518 1 relationship to AWP, subject to my being 1 they've reimbursed at a rate related to 2 2 able to confirm that via deposition. AWP. So if there are potential class 3 It is also my understanding 3 members who can demonstrate that AWP did 4 under the HCFA maximum allowable cost as 4 not enter into a calculation of 5 5 cited here is related to one of the reimbursement rate, it is my understanding definition, of whether it is FUL or MAC. 6 6 that they're not in the class. 7 7 The -- the HCFA or the -- the Q. The only way that you can determine that 8 is by asking them? Is that correct? 8 HCFA price that is being referred to here 9 A. The way that I would understand one would 9 I would need to confirm whether that is 10 indeed the federal upper limit as 10 determine that is that at the time of 11 described in footnote 55 of attachment D, 11 claims administration when one would come 12 which is section 4 of attachment D, and 12 forward and they could not demonstrate for those purposes, MAC or the federal that they were part of the class, they 13 13 14 upper limit essentially is a formulaic 14 would not be able to submit a claim or 15 percent of published price in the Blue 15 recover a claim under the litigation. 16 Book, in Medispan, or in the Red Book, and 16 O. Exactly what would you have to do during it is of the least costly generic 17 this allocation exercise to determine 17 18 substitute. 18 whether a particular class member has been 19 Now they talk about relating 19 damaged? 20 that to a price, a list price, in one of. 20 A. During the damage phase of the analysis, I expect to receive claims data from -- from 21 those books, in one of those price 21 compendia. It is unclear to me as I read a variety of third-party payers, from a 22 22 519 521 it whether it was AWP or WAC, but if it is selected, stratified sample of retailers 1 1 2 either, again there will be a formulaic 2 that will summarize claims across all 3 third-party payers, and based on that 3 relationship to AWP. So that in any of those cases, 4 claims information, I will be able to see 4 5 once I have estimated my but-for AWP based 5 what reimbursements were relative to AWP, 6 relative to the but-for AWP, relative to 6 on the yardsticks, I will have a but-for WAC and a but-for baseline as reported in 7 ASP, and I will be able to determine 7 the list prices, and I will assess how 8 whether that relationship differed by 8 9 different groups of third-party payers 9 that would be counted into a MAC that is formulaic related to an AWP but just to 10 such as large third-party payers who own 10 the but-for AWP. 11 their own PBM and their own mail order, 11 12 such as Cigna and Aetna, relative to 12 Q. What if the customer testifies that its 13 particular MAC list is not formulaically 13 third-party payers, such as the Blues, that do not. This is precisely the type 14 related to an AWP? Where are you at that 14 15 point? 15 of analysis that I have done with claims A. Well, if -data in damage calculations and going 16 16 17 MR. SOBOL: Objection to form. 17 toward allocation analysis in Hatch-Waxman 18 18 You may answer. matters. 19 A. Well, as we have discussed and as you have 19 Q. So when a particular class member comes in to perfect its damage claim, the first 20 explored in the definition of the class, a 20 21 thing you are going to have to do is 21 third-party payer or an individual is a member of either of these classes if 22 figure out all the ASPs for all the drugs 22

55 (Pages 534 to 537)

534 Q. Do you know anything about how physicians 1 MR. SOBOL: Objection. 1 2 A. I reviewed the summary in the Med. PAC 2 are reimbursed for injectables in the 3 report, and it is my recollection I got a 3 private sector? 4 copy of the Dyckman report that may be 4 A. I have seen claims on the part of listed here. Because it was conducted by oncologists for a particular 5 5 a group, that it might be listed under physician-administered drug to public and 6 6 private sector insurers. 7 that name, but I didn't go so far as to 7 critically interview any of the 8 O. That's in the Lupron case? 8 participants in the actual survey 9 A. That's correct. 9 10 research. 10 Q. Other than that, do you have any knowledge of how physicians are reimbursed for 11 Q. And you are in no position at this point 11 injectables --to testify as to the reliability of the 12 12 survey? Isn't that true? 13 13 MR. SOBOL: Objection. Q. -- in the private sector? 14 MR. SOBOL: Objection. 14 A. The description and its appearance in the MR. SOBOL: Objection. 15 15 Med. PAC report suggests to me that it is A. And incidentally what I observed in the 16 16 17 reliable. It is a report to Congress. It 17 Lupron case accorded precisely with this is not the journal of irreproducible -- with the Dyckman results. 18 18 19 results. So I -- there is certain 19 Have I looked at other -- have I 20 gravitas in the -- where it has appeared 20 done the kind of work that I have looked 21 that would lead me to think that it wasn't 21 at actual claims data by physicians done by, you know, three undergraduates on 22 22 submitted to third-party payers? That is 535 537 a street corner or something. part of the sample that I have asked to 1 1 2 Q. What are you going to do if it turns out 2 see as I have asked to see samples of 3 3 other groups to see exactly what those that it is not reliable? 4 MR. SOBOL: Objection. 4 claims submissions are and for both a 5 5 A. Well, I think it is pretty clear how the calculation of damages but also to assess 6 class is defined. That if it cannot be 6 whether they are related to AWP. 7 demonstrated, and as I will look more 7 O. Have you looked at any such claims data 8 closely during the damage analysis, that 8 with respect to the drugs at issue in this 9 AWP does not enter into reimbursements for 9 case? 10 a particular group, if what you are trying 10 MR. SOBOL: Objection. to say is that the surveyed third-party 11 A. I have -- I have asked for those 11 12 payers about which he, Dyckman, is 12 depositions to be noticed, and they have reporting survey results were befuddled, yet to be noticed as far as I know. 13 13 14 confused, or the survey was 14 Q. Have you looked at any contracts between inappropriately designed, well then it physicians and third-party payers with 15 15 respect to physician-administered drugs? 16 would be unreliable. 16 17 It appeared in a report that 17 A. I don't recall. would be subject to a certain amount of 18 18 Q. Do you know whether coverage for peer review that made me think that it had physician-administered drugs is part of 19 19 the medical benefit? been vetted to enough of an extent that I 20 20 21 could rely on the quote that I have put 21 A. In some cases, it can be.

22

O. And in other cases?

22

forward here.

	538		540
1	A. I mean it is either going to be under the	1	reimbursement rates would have been had
2	pharmacy benefit or the medical benefit.	2	the AWP scheme not been put in place.
3	Q. But you don't know which?	3	Q. And if there are trade-offs, will that
4	A. I think generally	4	have an impact on your opinion?
5	MR. SOBOL: Objection.	5	A. Which opinion?
6	A. I have yet to fully ascertain that, but my	6	Q. Your opinion that you can determine
7	understanding to date is that it is	7	whether there is classwide impact in
8	usually under a medical benefit.	8	connection with physician-administered
9	Q. Do you have any understanding as to how	9	drugs in the private sector.
10	third-party payers go about negotiating	10	MR. SOBOL: Objection.
11	contracts with physicians and other	11	A. No.
12	providers for physician-administered	12	Q. Do you have any understanding of the
13	drugs?	13	extent to which third-party payers in that
14	A. That is a subject to be fleshed out during	14	particular sector have knowledge of the
15	the damage analysis.	15	spread?
16	Q. Do you know whether insurance companies	16	MR. SOBOL: Objection.
17	and other third-party payers negotiate	17	A. My information is anecdotal at best, and
18	with physicians for the reimbursement rate	18	that is related to the Lupron matter.
19	that they're going to pay for the services	19	Q. Did it ever occur to you that insurance
20	as well as the drug?	20	companies have a pretty good handle on the
21	A. I do understand that.	21	spread and that they agree to base
22	Q. Okay. Do you know anything about the	22	reimbursement on AWP so they can avoid the
	539		541
1	trade-offs between the two?	1	transaction cost of a prolonged
2	A. Well, I know that, and it is my	2	negotiation over the service?
3	understanding, that in a negotiation	3	MR. SOBOL: Objection to form.
4	process they negotiate reimbursement for	4	A. I understand that negotiations go or I
5	services, and they negotiate reimbursement	5	would well, I would assume negotiations
6	for the drugs that are administered during	6	go on between third-party payers and
7	as part of those services.	7	oncologists, let's say, or whoever the

Q. And do you know whether there are 8 9 trade-offs between those two elements?

10 A. Well, as my direction from counsel at this point has been to focus on the fraud 11 constituted by the pharmaceutical aspects 12 13 of any mix of that grouping of payments,

and I have not been asked to focus on 14

15 whether the fraud slipped over, could have

been traded off in other ways.

Q. So you are assuming for now that there are 17 18

no trade-offs between the rate for the

services and the rate for the drugs in the

negotiation process? 20

16

19

A. For now, I'm taking as given what has been 21 negotiated, and I'm looking at what the 22

particular specialty is for the 8 9 physician-administered drug in the same way that negotiations go on as we have 10 looked at proforma contracts before, and I 11

would assume a number of things enter into 12

them, and it is my understanding and the 13 data that I have seen in Lupron indicates

14 that there is a relationship of those 15

price -- of the reimbursement rates to 16

17 AWP, and I have -- I have focused on that aspect of the negotiations or the results 18

19 of the negotiations as they appeared in

what was paid relative to AWP. 20 21

Q. Is it your understanding that each negotiation is potentially unique?

Henderson Legal / Spherion (202) 220-4158

22

October 8, 2004

57 (Pages 542 to 545)

542 544 MR. SOBOL: Objection to form. that are standard, and so the uniqueness 1 1 2 A. The -- the unique -- I guess I am not 2 is lost very quickly in the standard 3 quite sure what you mean about -- by 3 practices and procedures of what is "unique." That each particular -- you are 4 articulated in these contracts. 4 saying that at the end of the day every 5 5 O. How can you say that when you have never individual -- every third-party payer that 6 reviewed any contracts between PBMs and б comes and negotiates with every physician 7 payers and you have never reviewed any 7 that is administering physician-8 contracts between physicians and payers? 8 MR. SOBOL: Objection to the 9 administered drugs has a different 9 reimbursement contract with different 10 10 form. 11 percentages off of AWP? That there is for 11 You may answer. every -- for every unique agreement 12 12 A. I can say that by having reviewed -- by 13 between an insurer and a physician or an 13 looking at the proforma contracts that you have put in front of me, where there is a 14 oncology group, there is a different 14 15 resulting set of terms? 15 blank in front of the AWP less blank Q. What I am asking you is whether -percent, and then looking at data that 16 16 MR. EDWARDS: Strike that. 17 summarize at the end of the day what that 17 18 percent is, and that tells me that it is Q. What I am asking you is whether in 18 19 connection with each individual 19 13 to 17 percent for single source drugs. negotiation there is a negotiation over I can -- I can say that because 20 20 the price of the drug, there is a across a variety of industries there are 21 21 22 negotiation over the price of the service, 22 -- there are standards -- every 543 545 negotiation is, quote, unique, unquote, 1 there is a negotiation over other terms, 1 2 there is a negotiation over the trade-offs 2 but there are various ranges in which among all of those variables, and it is salaries are negotiated or prices are 3 3 4 difficult to predict in advance how any 4 negotiated if information is fully under particular negotiation is going to turn 5 -- is understood or is thought to be 5 out? It depends on the facts and 6 understood, given the set of information 6 7 7 that is there, such that the results are circumstances? A. I would say that the type of uniqueness 8 predictable. 8 9 you are talking about is also 9 So the validity of your opinion depends on characteristic of negotiations between 10 the extent to which it is appropriate to 10 third-party payers and PBMs and -- and an 11 focus on only one factor or one variable 11 12 important "and," spelled capital A, 12 contained in the contract, i.e. the price 13 capital N, capital D -- that uniqueness is 13 for the drug and whether it is a 14 bound very narrowly, within very 14 percentage off of AWP, and you would closely-set parameters, that lead to ignore the other factors? 15 15 16 results such that the final negotiations 16 MR. SOBOL: Objection. 17 of AWP less a percent ranges from 13 to 17 A. I would not ignore the other factors, and 18 17 percent, and although you have a 18 I think in response to one of the 19 different individual wearing a different 19 questions, I discussed those factors and 20 suit on a given day and driven by unique 20 what the charges were by different type of 21 factors, there are a set of proforma 21 service, and one would observe those, and 22 channels in which these negotiations run 22 I have observed those, and I have -- and

2 A. Okay. And now what? 3 Q. There is a section headed "Characteristics of Payment Systems for Drugs and of Payment Systems for Drugs and 5 Administration fees," and it states, 6 "There are several patterns and trends 7 regarding payment system characteristics 8 that can be inferred from the health plan 8 survey responses," and the first bullet 9 in is, quote, "There is a general 10 in quote, "There is a general 11 understanding among health plans that 12 physicians purchase drugs at prices that 13 are below 95 percent of AWP, and given 14 that health plan prices are generally at 15 or above this rate, the sale of drugs is a 16 profit center for physicians," close 17 quote. 17 quote. 18 Did you consider that in 20 your report with respect to the impact of 21 the alleged scheme on reimbursement rates 22 for physician-administered drugs in the 19 may private sector? 10 MR. SOBOL: Objection. 11 A. No. The - what this is saying and given 19 that cheeft that WAC is below AWP, this is 3 saying for all drugs by formula, so what 4 does this say? It says, "There is a 19 yardsticks are such that it is understood of the physicians purchase drugs at prices that a section in a position to behave to eliminate them? 19 that correct? 10 MR. SOBOL: Objection. 10 that are below 95 percent of AWP," and it 18 is under the yardsticks are such that it is understood 20 that ASP is more than five percent below 21 daministration codes." 2 daministration codes." 2 daministration codes."	1		1	
3 Q. There is a section headed "Characteristics of Payment Systems for Drugs and Administration fees," and it states, 5 in the states, 6 "There are several patterns and trends regarding payment system characteristics that are below 95 percent of AWP, and given that health plan prices are generally at 15 or above this rate, the sale of drugs is a profit center for physicians," close 17 quote.  18 Did you consider that in developing the opinions you developed in your report with respect to the impact of 21 the alleged scheme on reimbursement rates for physician-administered drugs in the 15 private sector?  1 A. No. The — what this is saying and given the fact that WaC is below AWP, this is saying for all drugs by formula, so what 14 that physicians purchase drugs at prices 15 general understanding among health plans that physicians and the physicians purchase drugs at prices 16 the fact that WAC is below AWP, this is saying for all drugs by formula, so what 16 that the below 95 percent of AWP, and given that health plan prices are generally at 2 the fact that WAC is below AWP, this is saying for all drugs by formula, so what 16 that physicians purchase drugs at prices a general understanding among health plans that physicians purchase drugs at prices and the physicians purchase drugs at prices and the price of the provided price of the pric				
4 of Payment Systems for Drugs and 5 Administration fees," and it states, 6 "There are several patterns and trends 7 regarding payment system characteristics 8 that can be inferred from the health plan 9 survey responses," and the first bullet 10 is, quote, "There is a general 11 understanding among health plans that 12 physicians purchase drugs at prices that 13 are below 95 percent of AWP, and given 14 the alth plan prices are generally at 15 or above this rate, the sale of drugs is a 16 profit center for physicians," close 17 quote. 18 Did you consider that in 19 developing the opinions you developed in 20 you report with respect to the impact of 21 the alleged scheme on reimbursement rates 22 for physician-administered drugs in the  15 private sector? 2 A. Yes. 3 Q. So this may be a situation similar to the one we discussed in attachment C where you 15 talked about whether if spreads were 16 understood to exist, competitors would be 17 no position to behave to eliminate them? 18 MR. SOBOL: Objection. 19 Q. Is that correct? 2 MR. SOBOL: Objection. 10 A. No. The — what this is saying and given 11 that are below 95 percent of AWP, and it 12 does this say? It says, "There is a 13 general understanding among health plans 14 that are below 95 percent of AWP, and it 15 that are a below 95 percent of AWP, and it 16 that are a below 95 percent of AWP, and it 17 that are a below 95 percent of AWP, and it 18 is under the yardsticks are such that it is understood 21 that ASP is more than five percent below 22 yardsticks are such that it is understood 23 that ASP is more than five percent below 24 that foan beauty is any understanding of how much below it is, 25 And, yes, it is below, but I see nothing here that indicates that there is any understanding of how much below it is, 26 And, yes, it is below, but I see nothing here that indicates that there is any understanding of how much below it is, 26 And it is a fire to it is any understanding of how much below it is. 27 A Ves. 28 Competitive actions that have since 29 S		•		•
Administration fees," and it states,  "There are several patterns and trends regarding payment system characteristics that can be inferred from the health plan survey responses," and the first bullet is, quote, "There is a general it understanding among health plans that physicians purchase drugs at prices that are below 95 percent of AWP, and given that health plan prices are generally at or above this rate, the sale of drugs is a profit center for physicians," close profit center for physicians, "close the alleged scheme on reimbursement rates for physician-administered drugs in the private sector?  A. Nes. Q. So this may be a situation similar to the one we discussed in attachment C where you talked about whether if spreads were understood to exist, competitors would be in a position to behave to eliminate them? M.R. SOBOL: Objection. A. N. The – what this is saying and given the fact that WAC is below AWP, this is saying for all drugs by formula, so what does this say? It says, "There is a general understanding among health plans that physicians purchase drugs at prices that are below 95 percent of AWP," and it is under the yardsticks that I have used in everything but for Medicare. The yardsticks are such that it is understood 21 that ASP is more than five percent below  And, ves, it is below, but I see nothing here that indicates that there is any understanding of how much below it is, And, ves, it is below, but I see nothing here that indicates that there is any understanding of how much below it is, And, ves, it is below, but I see nothing here that indicates that there is any understanding of how much below it is, that is the levels of spreads of precent of AWP, and it is, quote, "There is a peneral understanding and piven the fact that WAC is below AWP, this is saying for all drugs by formula, so what does this say? It says, "There is a general understanding among health plans that physicians purchase drugs at prices in that are below 95 percent of AWP," and it is under the yardsticks that I have used	l .	•		·
6 "There are several patterns and trends regarding payment system characteristics 8 that can be inferred from the health plan 9 survey responses," and the first bullet is, quote, "There is a general 10 that health plan start 12 physicians purchase drugs at prices that 12 physicians purchase drugs at prices that 13 are below 95 percent of AWP, and given 14 that health plan prices are generally at 15 or above this rate, the sale of drugs is a 16 profit center for physicians," close 17 quote. 17 quote. 18 Did you consider that in 20 you report with respect to the impact of 21 the alleged scheme on reimbursement rates 22 for physician-administered drugs in the 22 talked about whether if spreads were 18 understood to exist, competitors would be 19 no your report with respect to the word in a postition to behave to eliminate them? 10 MR. SOBOL: Objection. 11 A. No. The — what this is saying and given the fact that WAC is below AWP, this is 18 general understanding among health plans 16 that physicians purchase drugs at prices that 18 is under the yardsticks are such that it is understood 21 that ASP is more than five percent below 21 sadying and track that it is understood 21 that ASP is more than five percent below 21 sadding administration codes." 10 prices will consider raising fees for drug 21 that ASP is more than five percent below 21 sadding administration codes." 11 private sector? 12 private sector? 13 private sector? 14 private sector? 15 private sector? 15 private sector? 16 private sector? 17 private sector? 17 private sector? 18 private sector? 19 private sector? 19 private sector? 19 private sector? 10 private sector? 10 private sector? 11 private sector? 11 private sector? 12 private sector? 12 private sector? 13 private sector? 14 private sector? 15 private sector? 16 private sector? 17 private sector? 18 private sector? 19 private sector? 19 private sector? 19 private sector? 10 private sector? 10 private sector? 10 private sector? 10 private sector? 11 private sector? 12 private sector? 12 private s		• •		<u> </u>
regarding payment system characteristics that can be inferred from the health plan survey responses," and the first bullet is, quote, "There is a general understanding among health plans that physicians purchase drugs at prices that are below 95 percent of AWP, and given that health plan prices are generally at or above this rate, the sale of drugs is a profit center for physicians," close quote.  Did you consider that in developing the opinions you developed in developing the opinions you developed in your report with respect to the impact of the alleged scheme on reimbursement rates for physician-administered drugs in the private sector?  A. Yes.  Did you consider that in the alley below, how far below AWP ASP is, the activation similar to the one we discussed in attachment C where you talked about whether if spreads were ounderstood to exist, competitors would be made and the fact that WAC is below AWP, this is saying for all drugs by formula, so what does this say? It says, "There is a general understanding among health plans that physicians purchase drugs at prices any understanding percent that we saw in that health plan prices that that the thevels of spreads of three to four hundred percent that we saw in that the eliow of sure and it was only at that point that when that information became available that the government got exercised and persons got exercised.  So this is perfectly consistent with what I have put forward, and this is not enough information to know how badly below, how far below AWP ASP is, the activation similar to the one we discussed in attachment C where you talked about whether if spreads were that the activation similar to the one we discussed in attachment C where you talked about whether if spreads were that the cocur say with Lupron, when that understanding was much — made much clearer than kind of the general understanding that they are below 95 percent of AWP, and it is a position to behave to eliminate them?  A. No. The — what this is saying and given the fact that WAC is bel		· · · · · · · · · · · · · · · · · · ·		=
that can be inferred from the health plan survey responses," and the first bullet is, quote, "There is a general tunderstanding among health plans that physicians purchase drugs at prices that are below 95 percent of AWP, and given that health plan prices are generally at or above this rate, the sale of drugs is a profit center for physicians," close quote.  Did you consider that in developing the opinions you developed in your report with respect to the impact of the alleged scheme on reimbursement rates for physician-administered drugs in the private sector?  A. Yes.  So this may be a situation similar to the one we discussed in attachment C where you talked about whether if spreads were understood to exist, competitors would be may be made that WAC is below AWP, this is saying for all drugs by formula, so what does this say? It says, "There is a general understanding among health plans that physicians purchase drugs at prices are generally at the survey of that are below 95 percent of AWP," and it is understood to make for drug prices will consider raising fees for drug 20 yardsticks are such that it is understood 21 that ASP is more than five percent below and that first bullet on four hundred percent that we saw in Lupron, and it was only at that jost profered that in dicates that there is any understanding of how much below to four hundred percent that we saw in Lupron, and it was only at that jost promation became available that the government got exercised and persons got exercised.  So this is perfectly consistent with what I have put forward, and this is not enough information to know how badly below, how far below AWP ASP is, the actual acquisition cost, how much of a profit center that is for those third-party payers to start to take the competitors would be an actual acquisition cost, how much of a profit center that is for those third-party payers to start to take the competitors would be an actual acquisition cost, how much of a profit center that is for those third-party payers to start to take		<u>-</u>		
survey responses," and the first bullet is, quote, "There is a general understanding among health plans that 11 understanding among health plans that 12 physicians purchase drugs at prices that are below 95 percent of AWP, and given that health plan prices are generally at or above this rate, the sale of drugs is a 15 profit center for physicians," close quote.  Did you consider that in developing the opinions you developed in your report with respect to the impact of the alleged scheme on reimbursement rates 22 for physician-administered drugs in the 22 private sector?  A. Yes.  Q. So this may be a situation similar to the one we discussed in attachment C where you talked about whether if spreads were 6 understood to exist, competitors would be in a position to behave to eliminate them? MR. SOBOL: Objection.  MR. SOBOL: Objection.  A. No. The – what this is saying and given the fact that WAC is below AWP, this is saying for all drugs by formula, so what does this say? It says, "There is a general understanding among health plans that plan particular to the in everything but for Medicare. The yardsticks are such that it is understood 21 that ASP is more than five percent below 21 manuferstanding of how much below in that that the levels of spreads of three to four hundred percent that twe saw in Lupron, and it was only at that point that when that information became available that the government got exercised.  So this is perfectly consistent whith what I have put forward, and this is not enough information to know how badly below, how far below AWP ASP is, the actual acquisition cost, how much of a profit center that is for those third party payers to start to take the 20 competitive actions that have since started to occur say with Lupron, when that understanding was much – made much clearer than kind of the general understanding was much – made much clearer than kind of the general understanding was much – made much clearer than kind of the general understanding shate they are below 95 percent of AWP, and it				· ·
is, quote, "There is a general understanding among health plans that physicians purchase drugs at prices that are below 95 percent of AWP, and given that health plan prices are generally at or above this rate, the sale of drugs is a profit center for physicians," close quote.  Did you consider that in developing the opinions you developed in your report with respect to the impact of the alleged scheme on reimbursement rates for physician-administered drugs in the private sector?  A. Yes.  Did you so still report to the impact of the alleged scheme on reimbursement rates for physician-administered drugs in the private sector?  A. Yes.  Did you consider that in developing the opinions you developed in your report with respect to the impact of the alleged scheme on reimbursement rates for physician-administered drugs in the private sector?  A. Yes.  MR. SOBOL: Objection.  MR. SOBOL: Objection.  A. No. The — what this is saying and given the fact that WAC is below AWP, this is saying for all drugs by formula, so what does this say? It says, "There is a general understanding among health plans that physicians purchase drugs at prices and profit center that is is under the yardsticks that I have used in everything but for Medicare. The yardsticks are such that it is understood 20 that ASP is more than five percent below  is a did that the levels of spreads only at was only at that point that when that are point was only at that point that when that it is understood to so fit was only at that point that when that in the when that in formation became available that the government got exercised and persons got exercised.  So this in the levels of spreads only at that the government got exercised and persons got exercised.  So this in the levels of sups only at that the government got exercised.  So this that the elevels of furge which that is unde		<b>-</b>		*
11 understanding among health plans that 12 physicians purchase drugs at prices that 13 are below 95 percent of AWP, and given 14 that health plan prices are generally at 15 or above this rate, the sale of drugs is a 16 profit center for physicians," close 17 quote. 18 Did you consider that in 19 developing the opinions you developed in 20 your report with respect to the impact of 21 the alleged scheme on reimbursement rates 22 for physician-administered drugs in the 25 private sector? 2 A. Yes. 3 Q. So this may be a situation similar to the 4 one we discussed in attachment C where you 5 talked about whether if spreads were 6 understood to exist, competitors would be 10 in a position to behave to eliminate them? 11 A. No. The — what this is saying for all drugs by formula, so what 12 does this say? It says, "There is a 22 general understanding among health plans 15 is under the yardsticks that I have used 16 private sactor? 10 MR. SOBOL: Objection. 11 A. No. The developing the opinions you developed in 12 the that the below AWP, this is 13 saying for all drugs by formula, so what 14 does this say? It says, "There is a 15 general understanding among health plans 16 the physicians purchase drugs at prices 17 that are below 95 percent of AWP," and it 18 is under the yardsticks that I have used 19 in everything but for Medicare. The 20 yardsticks are such that it is understood 21 that ASP is more than five percent below 21 four hundred percent that we hen that information became available that the government got exercised. 22 by then that information became available that the government got exercised. 30 that the government got exercised. 30 by the that the government of the that the government got exercised. 30 that that power put forward, and this is 31 not enough information to know how badly below, how far below AWP ASP is, the 32 actual acquisition cost, how much of a 32 profit center that is for those third- 34 party payers to start to take the 35 that understanding was much — made much 35 that understanding		· · · · · · · · · · · · · · · · · · ·		=
physicians purchase drugs at prices that are below 95 percent of AWP, and given that health plan prices are generally at or above this rate, the sale of drugs is a persons got exercised.  Did you consider that in developing the opinions you developed in your report with respect to the impact of the alleged scheme on reimbursement rates for physician-administered drugs in the private sector?  A. Yes.  O. So this may be a situation similar to the one we discussed in attachment C where you talked about whether if spreads were understood to exist, competitors would be in a position to behave to eliminate them?  MR. SOBOL: Objection.  A. No. The what this is saying and given the fact that WAC is below AWP, this is saying for all drugs by formula, so what does this say? It says, "There is a general understanding among health plans that are below 95 percent of AWP," and it is under the yardsticks are such that it is understood 21 that ASP is more than five percent below  Lupron, and it was only at that point that when that information became available that the government got exercised and persons got exercised.  So this is perfectly consistent with what I have put forward, and this is not enough information to know how badly below, how far below AWP ASP is, the actual acquisition cost, how much of a profit center that is for those third-party payers to start to take the  competitive actions that have since started to occur say with Lupron, when that understanding that they are below 95 percent of AWP.  A. Yes.				<del>-</del>
are below 95 percent of AWP, and given that health plan prices are generally at or above this rate, the sale of drugs is a profit center for physicians," close quote.  Did you consider that in developing the opinions you developed in your report with respect to the impact of the alleged scheme on reimbursement rates for physician-administered drugs in the  private sector?  A. Yes.  Q. SOBOL: Objection. 9 Q. Is that correct? 10 MR. SOBOL: Objection. 11 A. No. The — what this is saying and given 12 the fact that WAC is below AWP, this is 13 saying for all drugs by formula, so what 14 does this say? It says, "There is a 15 general understanding among health plans 16 that physicians purchase drugs at prices 17 that are below 95 percent of AWP," and it 18 is under the yardsticks that I have used 19 in everything but for Medicare. The 20 yardsticks are such that it is understood 21 that understanding was much — made much 2 clearer than kind of the general 2 understanding that they are below 4 clearer than kind of the general 2 understanding that they are below 95 percent of AWP. 7 Q. And this is not enough information to 2 enable you to determine the extent to 3 which third-party payers understood the 2 extent of the spread between ASP and AWP? 2 Correct? 3 A. Certainly not. 3 Q. You would have to make further inquiry in 3 order to determine that? Correct? 4 A. Well, the inquiry I would have to make is 4 what I have laid out in my declaration. 4 Well, the inquiry I would have to make is 5 that physicians purchase drugs at prices 6 understanding that they are below 95 percent of AWP. 9 Q. And this is not enough information to 9 enable you to determine the extent to 9 which third-party payers understood the 10 extent of the spread between ASP and AWP? 11 A. Certainly not. 12 A. Certainly not. 13 Q. You would have to make further inquiry in 14 order to determine that? Correct? 15 A. Well, the inquiry I would have to make is 16 what I have laid out in my declaration. 17 Q. In the last bullet on this page, it 18 states, quote, "Approximately half of the 19 health plans planning to reduce drug 19 prices will consider raising fees for drug 20 administration codes."	1	private sector?	1	competitive actions that have since
one we discussed in attachment C where you talked about whether if spreads were understood to exist, competitors would be in a position to behave to eliminate them?  MR. SOBOL: Objection.  Obj	2	A. Yes.		started to occur say with Lupron, when
talked about whether if spreads were understood to exist, competitors would be in a position to behave to eliminate them?  MR. SOBOL: Objection.  Ocorrect?  A. Certainly not.  A. Certainly not.  A. Certainly not.  A. Well, the inquiry I would have to make further inquiry in order to determine that? Correct?  A. Well, the inquiry I would have to make is what I have laid out in my declaration.  MR. SOBOL: Objection.  Ocorrect?  A. Well, the inquiry I would have to make is what I have laid out in my declaration.  MR. SOBOL: Objection.  A. No. The — what this is saying and given extent of the spread between ASP and AWP?  Correct?  A. Certainly not.  A. Well, the inquiry I would have to make is what I have laid out in my declaration.  Ocorrect?  A. Well, the inquiry I would have to make is what I have laid out in my declaration.  A. Well, the inquiry I would have to make is states, quote, "Approximately half of the health plans planning to reduce drug prices will consider raising fees for drug administration codes."	3	Q. So this may be a situation similar to the	3	that understanding was much made much
of understood to exist, competitors would be in a position to behave to eliminate them?  NR. SOBOL: Objection.  RR. SOBOL: Objection.  MR. SOBOL: Objection.  A. No. The — what this is saying and given the fact that WAC is below AWP, this is saying for all drugs by formula, so what does this say? It says, "There is a general understanding among health plans that physicians purchase drugs at prices that physicians purchase drugs at prices that is under the yardsticks that I have used in everything but for Medicare. The yardsticks are such that it is understood the enable you to determine the extent to which third-party payers understood the extent of the spread between ASP and AWP?  Correct?  A. Certainly not.  Q. You would have to make further inquiry in order to determine that? Correct?  A. Well, the inquiry I would have to make is what I have laid out in my declaration.  That are below 95 percent of AWP," and it is under the yardsticks that I have used in everything but for Medicare. The yardsticks are such that it is understood the extent of the spread between ASP and AWP?  A. Certainly not.  A. Well, the inquiry I would have to make further inquiry in order to determine that? Correct?  A. Well, the inquiry I would have to make is what I have laid out in my declaration.  The below 95 percent of AWP," and it is understood the extent of the spread between ASP and AWP?  A. Certainly not.  Q. You would have to make further inquiry in order to determine that? Correct?  A. Well, the inquiry I would have to make is what I have laid out in my declaration.  The below 95 percent of AWP," and it is understood the extent of the spread between ASP and AWP?  A. Certainly not.  Q. You would have to make further inquiry in order to determine that? Correct?  A. Well, the inquiry I would have to make is what I have laid out in my declaration.  The below 95 percent of A	4	one we discussed in ottochment C where you		
in a position to behave to eliminate them?  MR. SOBOL: Objection.  Q. Is that correct?  MR. SOBOL: Objection.  Correct?  Correct?  A. No. The — what this is saying and given the fact that WAC is below AWP, this is saying for all drugs by formula, so what does this say? It says, "There is a general understanding among health plans that physicians purchase drugs at prices that physicians purchase drugs at prices that is under the yardsticks that I have used in everything but for Medicare. The yardsticks are such that it is understood the extent of the spread between ASP and AWP?  A. Certainly not.  A. Certainly not.  A. period. I -- this -- I am not seeing as a

characterization of so far of how the

	(x ages 55 1 to 551)		<u> </u>
	554		556
1	mean?	1	world worked during the class period.
2	A. I understand that to mean that as of	2	Q. Don't you have to consider the
3	August 2003 and as of the state of	3	relationship between the cost of the drug
4	understanding of pricing and expectations	4	and the cost of the service in determining
5	and a knowledge of occurrences in the	5	whether there has been an impact
6	industry, that at that time when this	6	MR. SOBOL: Objection.
7	survey was done approximately half of the	7	Q. — from the alleged scheme?
8	health plans were planning to reduce	8	MR. SOBOL: Objection.
9	prices or who are planning to reduce	9	A. No.
10	prices will consider raising fees for drug	10	Q. Let's assume that in the actual world a
11	administration codes.	11	payer pays \$10 for the drug and \$10 for
12	Q. So does this suggest to you that there is	12	the service, and then in the but-for world
13	a connection between the price of the drug	13	the payer pays \$5 for the drug and \$15 for
14	and the price of the service with respect	14	the service. Has that payer been injured?
15	to physician-administered drugs in the	15	MR. SOBOL: Objection.
16	private sector?	16	A. You you have asked me a different
17	MR. SOBOL: Objection to the	17	question. Your last question was did that
18	form.	18	change my opinion or have any influence on
19	You may answer.	19	my opinion about impact. Now you have
20	A. Well, on the face of it what it says to me	20	just asked a question about injury.
21	is that at the end of 2003, about a year	21	Which do you which one are
22	ago, only half of the plans, not all of	22	you asking me to answer?
١.	555	١.	557
1	the plans, will consider, having done so,	1	Q. I am asking you to answer my last
2	doing something about changing their drug	2	question.
3	prices and their fees, and they may link	3	A. Okay. So we're not talking about impact
4	them, or how they are going to do that, it	4	now. You are asking me a question about
5	is not particularly clear. I am seeing	5	injury. And in that context, could you
6	that there is an understanding by this	6	repeat the question, or can I have it read back?
7	survey based on what was known in the	7 8	MR. EDWARDS: Go ahead and read
8	market at that time that there was a necessity to do something about drug	9	it back.
9 10	pricing and how they were reimbursing for	10	(The reporter then read back as
11	drugs, and at the same time they were	11	follows:
12	going to do that, there is a consideration	12	"Question: Let's assume that in
13	of raising fees, and I there is not	13	the actual world a payer pays \$10 for the
14	enough here for me to learn whether they	14	drug and \$10 for the service, and then in
15	are tied or how they are trading that off	15	the but-for world the payer pays \$5 for
16	or what that means; and, secondly, this is	16	the drug and \$15 for the service. Has
17	going from you know, they are talking	17	that payer been injured?")
18	about doing this in they will consider	18	MR. SOBOL: Same objection.
19	it in 2003. Whether they are doing that	19	A. Without a broader context, I the

Raymond S. Hartman, Ph.D. Confidential - Attorneys' Eyes Only Volume II Boston, MA

October 8, 2004

560

561

61 (Pages 558 to 561)

558 Q. What broader context would you need? A. The -- the -- you have posited a situation where the drug cost is the same as the physician services. You have -- I would need to know whether the, as I look at the, as I say, the contracts for the PBMs and their clients, drug costs relative to the other services are much smaller, and whether that would influence those lineby-line costs, the -- whether they are related would depend on that. You are asking me about now a relationship in a particular context where it is \$10, \$10. It's the same.

I will answer as follows: that what I have been asked to do is examine the impact of what the - specifically the AWP inflation scheme, what that impact and injury and -- injury and damages, what the impact was, and what the injury and damages were, and I am focusing on that specifically.

A. Well, the -- what I say there is that Medicare reimbursement for all Part B-covered drugs was set at the lesser of the estimated acquisition cost, which I have seen described separately as the average acquisition cost, or -- and if we're talking about an average acquisition cost, averaged over a large number of acquirers, that is going to be equal to the average price at which it was sold to those broad number of acquirers at the average cost at which they acquired it. So that the supply and demand curve will intersect, and that the average acquisition cost will equal the average sale price. Oh, I am sorry. And you are saying or the --I am taking the average

acquisition cost as equal to the average

sale price, and then the continuation of

the sentence -- I now see the confusion on

Q. Now I want to talk to physicianadministered Part B. As I understand it

with respect to Part B drugs, your but-for

4 spread is zero. Is that correct?

5 A. That is correct.

3

6 Q. And you say that that is by regulation? 7 Is that correct?

8 A. That is as a matter of my interpretation 9 of the regulations.

10 Q. You are not an expert on Medicare regulations? Correct? 11

12 A. I am not an expert on statutory complexities of Medicare regulations. 13

Q. You don't have a law degree? Is that 14 correct? 15

A. No. 16

18

19

21 22

17 Q. And in footnote 48 where you explain this

- that is footnote 48 on page 22 - you

seem to be saying that AWP should equal

20 ASP because the regulations set

reimbursement at the lesser of AWP or EAC.

Is that right?

1 your face -- is "or the national average 2 wholesale price." 3

Should I reanswer that question? Q. That would be fine, because you have completely lost me.

MR. SOBOL: Not bad. You made it after four o'clock on day 2 until that happened.

(Laughter.)

MR. SOBOL: We could read back your answer, if you want.

12 THE WITNESS: Actually the answer is irrelevant. Why don't you read 14 back the question.

15 BY MR. EDWARDS:

16 Q. I am trying to understand your basis for opining that the but-for spread under 17 Medicare Part B should be zero. 18

A. That's what I was getting at. I just was 19 20 getting ahead of myself. 21

Essentially as I read the regulations, I read the regulations that

22

Doesn't the fact that the regulation	2 3 4 5 6 7 8 9 10	people pled guilty to them. I understand that a settlement amount of \$875 million was paid to the government. I understand that TAP admitted to certain practices and that they stopped those practices. And in responding to stopping those practices, they said that they would report their ASPs.  Now that to me says whatever those lawyers knew, the interpretation was
2 3 4 5 6 7 8 9 10	opinion that that is what is meant, as is what is reflected actually in the sentencing memorandum and to what TAP has agreed to do that what they should have been charging and what the reimbursement rate should have been set at was ASP. So the markup above ASP was zero, and that is the but-for markup. In other words, the but-for AWP equals the ASP.  Q. Doesn't the fact that the regulation distinguishes between AWP and EAC suggest	2 3 4 5 6 7 8 9 10	people pled guilty to them. I understand that a settlement amount of \$875 million was paid to the government. I understand that TAP admitted to certain practices and that they stopped those practices. And in responding to stopping those practices, they said that they would report their ASPs.  Now that to me says whatever those lawyers knew, the interpretation was not dissimilar to what this seems to be
2 3 4 5 6 7 8 9 10 11 12	opinion that that is what is meant, as is what is reflected actually in the sentencing memorandum and to what TAP has agreed to do — that what they should have been charging and what the reimbursement rate should have been set at was ASP. So the markup above ASP was zero, and that is the but-for markup. In other words, the but-for AWP equals the ASP.  Q. Doesn't the fact that the regulation distinguishes between AWP and EAC suggest that HCFA knew there was a difference	2 3 4 5 6 7 8 9 10 11 12	people pled guilty to them. I understand that a settlement amount of \$875 million was paid to the government. I understand that TAP admitted to certain practices and that they stopped those practices. And in responding to stopping those practices, they said that they would report their ASPs.  Now that to me says whatever those lawyers knew, the interpretation was not dissimilar to what this seems to be saying, if that's what their — if they
2 3 4 5 6 7 8 9 10 11 12 13	opinion that that is what is meant, as is what is reflected actually in the sentencing memorandum and to what TAP has agreed to do — that what they should have been charging and what the reimbursement rate should have been set at was ASP. So the markup above ASP was zero, and that is the but-for markup. In other words, the but-for AWP equals the ASP.  Q. Doesn't the fact that the regulation distinguishes between AWP and EAC suggest that HCFA knew there was a difference between the two?	2 3 4 5 6 7 8 9 10 11 12 13	people pled guilty to them. I understand that a settlement amount of \$875 million was paid to the government. I understand that TAP admitted to certain practices and that they stopped those practices. And in responding to stopping those practices, they said that they would report their ASPs.  Now that to me says whatever those lawyers knew, the interpretation was not dissimilar to what this seems to be saying, if that's what their — if they are going to be reporting ASP and that's
2 3 4 5 6 7 8 9 10 11 12 13 14	opinion that that is what is meant, as is what is reflected actually in the sentencing memorandum and to what TAP has agreed to do — that what they should have been charging and what the reimbursement rate should have been set at was ASP. So the markup above ASP was zero, and that is the but-for markup. In other words, the but-for AWP equals the ASP.  Q. Doesn't the fact that the regulation distinguishes between AWP and EAC suggest that HCFA knew there was a difference between the two?  MR. SOBOL: Objection.	2 3 4 5 6 7 8 9 10 11 12 13 14	people pled guilty to them. I understand that a settlement amount of \$875 million was paid to the government. I understand that TAP admitted to certain practices and that they stopped those practices. And in responding to stopping those practices, they said that they would report their ASPs.  Now that to me says whatever those lawyers knew, the interpretation was not dissimilar to what this seems to be saying, if that's what their — if they
2 3 4 5 6 7 8 9 10 11 12 13 14 15	opinion that that is what is meant, as is what is reflected actually in the sentencing memorandum and to what TAP has agreed to do that what they should have been charging and what the reimbursement rate should have been set at was ASP. So the markup above ASP was zero, and that is the but-for markup. In other words, the but-for AWP equals the ASP.  Q. Doesn't the fact that the regulation distinguishes between AWP and EAC suggest that HCFA knew there was a difference between the two?  MR. SOBOL: Objection.  You may answer.	2 3 4 5 6 7 8 9 10 11 12 13 14 15	people pled guilty to them. I understand that a settlement amount of \$875 million was paid to the government. I understand that TAP admitted to certain practices and that they stopped those practices. And in responding to stopping those practices, they said that they would report their ASPs.  Now that to me says whatever those lawyers knew, the interpretation was not dissimilar to what this seems to be saying, if that's what their if they are going to be reporting ASP and that's what they are going to be reimbursing at, that that was what was in the minds of
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	opinion that that is what is meant, as is what is reflected actually in the sentencing memorandum and to what TAP has agreed to do — that what they should have been charging and what the reimbursement rate should have been set at was ASP. So the markup above ASP was zero, and that is the but-for markup. In other words, the but-for AWP equals the ASP.  Q. Doesn't the fact that the regulation distinguishes between AWP and EAC suggest that HCFA knew there was a difference between the two?  MR. SOBOL: Objection.  You may answer.  A. I don't know what HCFA knew. I know what	2 3 4 5 6 7 8 9 10 11 12 13 14	people pled guilty to them. I understand that a settlement amount of \$875 million was paid to the government. I understand that TAP admitted to certain practices and that they stopped those practices. And in responding to stopping those practices, they said that they would report their ASPs.  Now that to me says whatever those lawyers knew, the interpretation was not dissimilar to what this seems to be saying, if that's what their — if they are going to be reporting ASP and that's what they are going to be reimbursing at, that that was what was in the minds of those of the legislature or when these
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	opinion that that is what is meant, as is what is reflected actually in the sentencing memorandum and to what TAP has agreed to do that what they should have been charging and what the reimbursement rate should have been set at was ASP. So the markup above ASP was zero, and that is the but-for markup. In other words, the but-for AWP equals the ASP.  Q. Doesn't the fact that the regulation distinguishes between AWP and EAC suggest that HCFA knew there was a difference between the two?  MR. SOBOL: Objection.  You may answer.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	people pled guilty to them. I understand that a settlement amount of \$875 million was paid to the government. I understand that TAP admitted to certain practices and that they stopped those practices. And in responding to stopping those practices, they said that they would report their ASPs.  Now that to me says whatever those lawyers knew, the interpretation was not dissimilar to what this seems to be saying, if that's what their if they are going to be reporting ASP and that's what they are going to be reimbursing at, that that was what was in the minds of
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	opinion that that is what is meant, as is what is reflected actually in the sentencing memorandum and to what TAP has agreed to do — that what they should have been charging and what the reimbursement rate should have been set at was ASP. So the markup above ASP was zero, and that is the but-for markup. In other words, the but-for AWP equals the ASP.  Q. Doesn't the fact that the regulation distinguishes between AWP and EAC suggest that HCFA knew there was a difference between the two?  MR. SOBOL: Objection.  You may answer.  A. I don't know what HCFA knew. I know what I read in the summaries of the regulations as I have read them. I have also read the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	people pled guilty to them. I understand that a settlement amount of \$875 million was paid to the government. I understand that TAP admitted to certain practices and that they stopped those practices. And in responding to stopping those practices, they said that they would report their ASPs.  Now that to me says whatever those lawyers knew, the interpretation was not dissimilar to what this seems to be saying, if that's what their — if they are going to be reporting ASP and that's what they are going to be reimbursing at, that that was what was in the minds of those of the legislature or when these regulations were written, and I can only take them at face valve and read what I am
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	opinion that that is what is meant, as is what is reflected actually in the sentencing memorandum and to what TAP has agreed to do — that what they should have been charging and what the reimbursement rate should have been set at was ASP. So the markup above ASP was zero, and that is the but-for markup. In other words, the but-for AWP equals the ASP.  Q. Doesn't the fact that the regulation distinguishes between AWP and EAC suggest that HCFA knew there was a difference between the two?  MR. SOBOL: Objection.  You may answer.  A. I don't know what HCFA knew. I know what I read in the summaries of the regulations as I have read them. I have also read the portions of the sentencing memorandum	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	people pled guilty to them. I understand that a settlement amount of \$875 million was paid to the government. I understand that TAP admitted to certain practices and that they stopped those practices. And in responding to stopping those practices, they said that they would report their ASPs.  Now that to me says whatever those lawyers knew, the interpretation was not dissimilar to what this seems to be saying, if that's what their — if they are going to be reporting ASP and that's what they are going to be reimbursing at, that that was what was in the minds of those of the legislature or when these regulations were written, and I can only take them at face valve and read what I am assuming the government is saying those
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	opinion that that is what is meant, as is what is reflected actually in the sentencing memorandum and to what TAP has agreed to do — that what they should have been charging and what the reimbursement rate should have been set at was ASP. So the markup above ASP was zero, and that is the but-for markup. In other words, the but-for AWP equals the ASP.  Q. Doesn't the fact that the regulation distinguishes between AWP and EAC suggest that HCFA knew there was a difference between the two?  MR. SOBOL: Objection.  You may answer.  A. I don't know what HCFA knew. I know what I read in the summaries of the regulations as I have read them. I have also read the portions of the sentencing memorandum saying what TAP said it was going to	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	people pled guilty to them. I understand that a settlement amount of \$875 million was paid to the government. I understand that TAP admitted to certain practices and that they stopped those practices. And in responding to stopping those practices, they said that they would report their ASPs.  Now that to me says whatever those lawyers knew, the interpretation was not dissimilar to what this seems to be saying, if that's what their — if they are going to be reporting ASP and that's what they are going to be reimbursing at, that that was what was in the minds of those of the legislature or when these regulations were written, and I can only take them at face value and read what I am assuming the government is saying those reimbursement rates should be.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	opinion that that is what is meant, as is what is reflected actually in the sentencing memorandum and to what TAP has agreed to do — that what they should have been charging and what the reimbursement rate should have been set at was ASP. So the markup above ASP was zero, and that is the but-for markup. In other words, the but-for AWP equals the ASP.  Q. Doesn't the fact that the regulation distinguishes between AWP and EAC suggest that HCFA knew there was a difference between the two?  MR. SOBOL: Objection.  You may answer.  A. I don't know what HCFA knew. I know what I read in the summaries of the regulations as I have read them. Now does that cause you to reconsider your opinion that the but-for AWP for Medicare Part B should be equal to	2 3 4 5 6 7 8	the spread between list price and AWP was known to the government in various ways and assumed by the Medicare system, I don't know what to make of that. I know that the RTP scheme was based on a comparison between AWP and ASP, and I know that the participants in the fraud and the
2 3 4 5 6 7 8 9	between list price and AWP was known to the government in various ways and assumed by the Medicare reimbursement system."  Now does that cause you to reconsider your opinion that the but-for AWP for Medicare Part B should be equal to ASP?	2 3 4 5 6 7 8 9	the spread between list price and AWP was known to the government in various ways and assumed by the Medicare system, I don't know what to make of that. I know that the RTP scheme was based on a comparison between AWP and ASP, and I know that the participants in the fraud and the oncologists that pled guilty were billing
2 3 4 5 6 7 8 9	between list price and AWP was known to the government in various ways and assumed by the Medicare reimbursement system."  Now does that cause you to reconsider your opinion that the but-for AWP for Medicare Part B should be equal to ASP?  MR. SOBOL: Well, may he be	2 3 4 5 6 7 8 9	the spread between list price and AWP was known to the government in various ways and assumed by the Medicare system, I don't know what to make of that. I know that the RTP scheme was based on a comparison between AWP and ASP, and I know that the participants in the fraud and the oncologists that pled guilty were billing at AWP. And and that there was what
2 3 4 5 6 7 8 9 10	between list price and AWP was known to the government in various ways and assumed by the Medicare reimbursement system."  Now does that cause you to reconsider your opinion that the but-for AWP for Medicare Part B should be equal to ASP?  MR. SOBOL: Well, may he be permitted to read the sentence that	2 3 4 5 6 7 8 9 10 11	the spread between list price and AWP was known to the government in various ways and assumed by the Medicare system, I don't know what to make of that. I know that the RTP scheme was based on a comparison between AWP and ASP, and I know that the participants in the fraud and the oncologists that pled guilty were billing at AWP. And and that there was what was the fundamental issue here was not
2 3 4 5 6 7 8 9 10 11 12	between list price and AWP was known to the government in various ways and assumed by the Medicare reimbursement system."  Now does that cause you to reconsider your opinion that the but-for AWP for Medicare Part B should be equal to ASP?  MR. SOBOL: Well, may he be permitted to read the sentence that follows it?	2 3 4 5 6 7 8 9 10 11 12	the spread between list price and AWP was known to the government in various ways and assumed by the Medicare system, I don't know what to make of that. I know that the RTP scheme was based on a comparison between AWP and ASP, and I know that the participants in the fraud and the oncologists that pled guilty were billing at AWP. And and that there was what was the fundamental issue here was not that there was that there was that
2 3 4 5 6 7 8 9 10 11 12 13	between list price and AWP was known to the government in various ways and assumed by the Medicare reimbursement system."  Now does that cause you to reconsider your opinion that the but-for AWP for Medicare Part B should be equal to ASP?  MR. SOBOL: Well, may he be permitted to read the sentence that follows it?  MR. EDWARDS: He can read	2 3 4 5 6 7 8 9 10 11 12 13	the spread between list price and AWP was known to the government in various ways and assumed by the Medicare system, I don't know what to make of that. I know that the RTP scheme was based on a comparison between AWP and ASP, and I know that the participants in the fraud and the oncologists that pled guilty were billing at AWP. And and that there was what was the fundamental issue here was not that there was that there was that the list price was lower, but it is
2 3 4 5 6 7 8 9 10 11 12 13 14	between list price and AWP was known to the government in various ways and assumed by the Medicare reimbursement system."  Now does that cause you to reconsider your opinion that the but-for AWP for Medicare Part B should be equal to ASP?  MR. SOBOL: Well, may he be permitted to read the sentence that follows it?  MR. EDWARDS: He can read anything he wants.	2 3 4 5 6 7 8 9 10 11 12 13 14	the spread between list price and AWP was known to the government in various ways and assumed by the Medicare system, I don't know what to make of that. I know that the RTP scheme was based on a comparison between AWP and ASP, and I know that the participants in the fraud and the oncologists that pled guilty were billing at AWP. And and that there was what was the fundamental issue here was not that there was that there was that the list price was lower, but it is exactly what is the next sentence: "That it was neither assumed or known to the
2 3 4 5 6 7 8 9 10 11 12 13 14 15	between list price and AWP was known to the government in various ways and assumed by the Medicare reimbursement system."  Now does that cause you to reconsider your opinion that the but-for AWP for Medicare Part B should be equal to ASP?  MR. SOBOL: Well, may he be permitted to read the sentence that follows it?  MR. EDWARDS: He can read anything he wants.  (Pause.)  (The witness viewing Hartman	2 3 4 5 6 7 8 9 10 11 12 13 14 15	the spread between list price and AWP was known to the government in various ways and assumed by the Medicare system, I don't know what to make of that. I know that the RTP scheme was based on a comparison between AWP and ASP, and I know that the participants in the fraud and the oncologists that pled guilty were billing at AWP. And and that there was what was the fundamental issue here was not that there was that there was that the list price was lower, but it is exactly what is the next sentence: "That
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	between list price and AWP was known to the government in various ways and assumed by the Medicare reimbursement system."  Now does that cause you to reconsider your opinion that the but-for AWP for Medicare Part B should be equal to ASP?  MR. SOBOL: Well, may he be permitted to read the sentence that follows it?  MR. EDWARDS: He can read anything he wants.  (Pause.)	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	the spread between list price and AWP was known to the government in various ways and assumed by the Medicare system, I don't know what to make of that. And and that there was what was the fundamental issue here was not that there was that there was that the list price was lower, but it is exactly what is the next sentence: "That it was neither assumed or known to the government that it was that much lower,"
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	between list price and AWP was known to the government in various ways and assumed by the Medicare reimbursement system."  Now does that cause you to reconsider your opinion that the but-for AWP for Medicare Part B should be equal to ASP?  MR. SOBOL: Well, may he be permitted to read the sentence that follows it?  MR. EDWARDS: He can read anything he wants.  (Pause.)  (The witness viewing Hartman Exhibit No. 021.)	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	the spread between list price and AWP was known to the government in various ways and assumed by the Medicare system, I don't know what to make of that. I know that the RTP scheme was based on a comparison between AWP and ASP, and I know that the participants in the fraud and the oncologists that pled guilty were billing at AWP. And and that there was what was the fundamental issue here was not that there was that there was that the list price was lower, but it is exactly what is the next sentence: "That it was neither assumed or known to the government that it was that much lower," and that's the source of the damages.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	between list price and AWP was known to the government in various ways and assumed by the Medicare reimbursement system."  Now does that cause you to reconsider your opinion that the but-for AWP for Medicare Part B should be equal to ASP?  MR. SOBOL: Well, may he be permitted to read the sentence that follows it?  MR. EDWARDS: He can read anything he wants.  (Pause.)  (The witness viewing Hartman Exhibit No. 021.)  A. The — in what I have reviewed of the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	the spread between list price and AWP was known to the government in various ways and assumed by the Medicare system, I don't know what to make of that. I know that the RTP scheme was based on a comparison between AWP and ASP, and I know that the participants in the fraud and the oncologists that pled guilty were billing at AWP. And and that there was what was the fundamental issue here was not that there was that there was that the list price was lower, but it is exactly what is the next sentence: "That it was neither assumed or known to the government that it was that much lower," and that's the source of the damages.  Q. What he is saying is that the but-for
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	between list price and AWP was known to the government in various ways and assumed by the Medicare reimbursement system."  Now does that cause you to reconsider your opinion that the but-for AWP for Medicare Part B should be equal to ASP?  MR. SOBOL: Well, may he be permitted to read the sentence that follows it?  MR. EDWARDS: He can read anything he wants.  (Pause.)  (The witness viewing Hartman Exhibit No. 021.)  A. The — in what I have reviewed of the sentencing memorandum and of the Complaint	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	the spread between list price and AWP was known to the government in various ways and assumed by the Medicare system, I don't know what to make of that. I know that the RTP scheme was based on a comparison between AWP and ASP, and I know that the participants in the fraud and the oncologists that pled guilty were billing at AWP. And and that there was what was the fundamental issue here was not that there was that there was that the list price was lower, but it is exactly what is the next sentence: "That it was neither assumed or known to the government that it was that much lower," and that's the source of the damages.  Q. What he is saying is that the but-for spread, in your terminology, should be
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	between list price and AWP was known to the government in various ways and assumed by the Medicare reimbursement system."  Now does that cause you to reconsider your opinion that the but-for AWP for Medicare Part B should be equal to ASP?  MR. SOBOL: Well, may he be permitted to read the sentence that follows it?  MR. EDWARDS: He can read anything he wants.  (Pause.)  (The witness viewing Hartman Exhibit No. 021.)  A. The — in what I have reviewed of the sentencing memorandum and of the Complaint in Lupron and the data of TAP's detailed	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	the spread between list price and AWP was known to the government in various ways and assumed by the Medicare system, I don't know what to make of that. I know that the RTP scheme was based on a comparison between AWP and ASP, and I know that the participants in the fraud and the oncologists that pled guilty were billing at AWP. And and that there was what was the fundamental issue here was not that there was that there was that the list price was lower, but it is exactly what is the next sentence: "That it was neither assumed or known to the government that it was that much lower," and that's the source of the damages.  Q. What he is saying is that the but-for spread, in your terminology, should be 25 percent; correct?

1	Q. Let me show you a number.	1	after.
2	MR. EDWARDS: We will mark as	2	(Pause.)
3	Exhibit 22 a copy of a transcript in	3	(The witness viewing Hartman
4	U.S. v. MacKenzie for June 24, 2004.	4	Exhibit No. 022.)
5	(Copy of transcript in United	5	(Ms. Halpern exiting the
6	States versus Alan MacKenzie	6	deposition room at 4:21 p.m.)
7	et al dated June 24, 2004	7	A. Having read this, I can only conclude I
8	marked Exhibit Hartman 022	8	conclude the following. Mr. Loucks is an
9	for identification.)	9	attorney. He is talking he himself is
10	BY MR. EDWARDS:	10	talking about that essentially the
11	Q. I want you to turn to page 68 of this	11	estimated acquisition cost was taken to be
12	transcript.	12	five percent below AWP, and that his
13	(Witness complies.)	13	description of what was happening in the
14	Q. Beginning on line 4	14	world I did not find confirmed by claims
15	A. Prior to answering your question, if I	15	submitted by physicians to Medicare for
16	might, who are the defendants in this	16	Lupron and injections, and if indeed the
17	matter? Who is Alan MacKenzie?	17	regulations were not followed and
18	Q. These were, as I understand it, TAP	18	estimated acquisition cost turned out to
19	employees	19	be 25 percent, and that was really what
20	A. Okay.	20	was being paid, well, then that should be
21	Q and others, but primarily TAP	21	the spread. But I have seen no evidence
22	employees.	22	of that.
	571	$\vdash$	573
1	A. Okay. And I am sorry. Which page did you	1	I see he is saying it is a
2	direct me to?	2	historical fact not proven to this jury.
3	O I directed you to page 68, heginning at	3	It has not been proven to me either. And

Q. I directed you to page 68, beginning at line 4, where Mr. Loucks says, "And the 4 5

25 percent, everyone gets that. That's

there. That is what Congress expected 6 7

with AWP."

Does that affect your opinion that the but-for spread for Medicare Part B should be zero by regulation?

MR. SOBOL: Objection to the

12

8

9

10

11

21

A. The -- my interpretation -- actually 13

14 before I venture forth, let me just again

read the --15

Q. Can't you just answer that yes or no? I 16 17

don't need your interpretation. A yes or 18 no arswer would be just fine.

A. In order for me to answer yes or no, 19

20 counselor, I must read -- my

interpretation, to give that yes or no, I

22 want to read a few sentences prior and It has not been proven to me either. And

4 I don't think it has been -- I don't see

5 it proven in the record here. And it

6 certainly was not in oncology claims data 7

that I have seen in the Lupron matter. 8

Q. So you are not going to give me a yes or no answer to my question?

10 A. (No audible response.)

MR. SOBOL: Objection. Asked and answered.

13 Q. Is it your opinion that estimated

14 acquisition cost and average wholesale

price as used in the Medicare 15

reimbursement regulations mean the same 16

17 thing?

9

11

12

A. No. You said average wholesale price? 18

19 Q. Yes.

And estimated acquisition cost? 20 A.

21 Q. Yes.

22 A. No.

WAC is merely what I sell that's what I sell it to and which the wholesalers take possession of that drug to turn around and resell it for me. And ASP is merely the gross amount that I receive plus all the payments that I make  Q. Right.

October 8, 2004

22 Q. On page 24 of your report?

66 (	Pages 578 to 581)		
	578		580
1	it for less than WAC, I have to make them	1	A. Actually, a little bit before that, but
2	whole.	2	close. The but-for AWP would be
3	Q. Right.	3	calculated by the difference between the
4	A. So I have to pay them a chargeback. And	4	spread implied by the numbers you just
5	then I offer discounts to, potentially to	5	gave me, and that spread is 125 minus 60
6	third-party payers, to PBMs. I offer	6	over 60.
7	discounts to retail chains, to docs.	7	Q. Right. And that is a definite number?
8	Q. And ASP is net of all that; correct?	8	Correct?
9	A. Correct.	9	A. That is a definite number.
10	Q. Which is what I said in the first place.	10	Q. So you have that number. What other
11	Right?	11	numbers would you need?
12	MR. SOBOL: Objection.	12	A. I would need the and I would need the
13	A. I'm not sure I agree with that. I	13	but-for spread, which would be, if this
14	don't know what you said in the first	14	this number is whatever it turns out to
15	place.	15	be, in excess of 100 percent.
16	Q. ASP is the amount that is left in the drug	16	The but-for spreads, depending
17	company's pocket after all of that you	17	on which type of drug this would be, would
18	have just described has occurred?	18	be as illustrated by the information put
19	A. That is certainly true.	19	forward so far among if it is a
20	Q. Okay.	20	single-source branded drug, it would range
21	A. It is what they are willing to sell their	21	from 16 to 33 percent.
22	drug for, the unit revenue which they are	22	Q. But now a single-source branded drug is
	579		581
1	willing to sell their drug for given the	1	also sometimes administered by physicians?
2	strategic position of their drug.	2	Correct?
3	Q. And that is 60 in my hypothesis?	3	A. A single-source branded drug I'm taking as
4	A. Correct.	4	one that is not administered via
5	Q. And the WAC in my hypothesis is 100?	5	physician. I am taking I am taking
6	A. That's correct.	6	I am looking I would I am going to
7	Q. Okay. Now the but-for AWP you say cannot	7	break out by NDC those drugs that are not
8	be determined from those numbers?	8	administered by physicians.
9	A. You have given me a hypothetical, and	9	Q. So those categories of drugs for which you
10	according to this hypothetical, the spread	10	calculate at this point preliminary
11	would be greater than 100 percent.	11	spreads are all mutually exclusive?
12	Q. Whatever it is, what is the but-for AWP in	12	A. That's correct.
13	that hypothetical?	13	Q. And collectively exhaustive?
14	MR. SOBOL: Objection.	14	A. They will be.
15	A. The but-for	15	Q. But no drug falls into more than one of
16	MR. SOBOL: The same objection I	16	those categories?
17	had before.	17	A. Are you talking about an NDC or a drug? I
18	A. The but-for AWP, I would take that ASP,	18	mean there are some NDCs that appear in
19	and without a calculator I am lost, so I	19	oral form and some in injectable form, and
20	will just show you the equations into	20	some of those could be sold at retail or
21	which I would plug it.	21	through PBMs, and some could be

22

administered -- and there is one example

October 8, 2004

			67 (Pages 582 to 585)
	582		584
1	in my table, and I think it is cytoxan,	1	generic drug. They have AWPs, but I don't
2	where there is a powder for solution which	2	recall examining closely WACs for generic
3	is which is a physician-administered	3	drugs.
4	drug, and then there is also a tablet, and	4	Q. So in the case of generic drugs that don't
5	there are quite distinct and different	5	have WACs, which may be all generic drugs
6	actual spreads for those two drugs based	6	or just some, there is no manufacturer-
7	on this very preliminary use of the data,	7	endorsed indication of a relationship
8	and there are different yardsticks to	8	between wholesaler price and the price
9	which I would compare them to.	9	charged to retailers by wholesalers?
10	Q. And the yardsticks you will ascertain by	10	Correct?
11	looking at actual data to see the	11	MR. SOBOL: Objection.
12	difference in actual terms between the	12	A. There is an endorsement of an AWP, and
13	listed AWP for the drug you are studying	13	that is primarily the endorsement that I
14	and the sale price, the actual sale price	14	am most familiar with.
15	for that drug to that class of trade?	15	Q. Now in your but-for world, you keep
16	MR. SOBOL: Objection.	16	constant the relationship between AWP and
17	Q. Is that correct?	17	MAC for branded drugs not MAC, I am
18	MR. SOBOL: Objection.	18	sorry, WAC wrong consonant. Okay? You
19	A. You asked about the yardsticks. Right?	19	do, don't you?
20	Q. Yes.	20	A. I don't keep it constant. The drug
21	A. The yardsticks, I am going to look I am	21	companies do.
22	going to refine the yardsticks that	22	Q. And you do in your but-for world. That's
	583 -		585

1	So to the extent that I would	1	relationship. The relationship the key
2	need WAC, then I would have to turn to an	2	relationship here, what is driving the
3	assumption about the constancy of that	3	alleged conspiracy, is AWP as the
4	relationship.	4	benchmark price. And, yes, there is an
5	Q. In the arithmetic you have done and	5	arithmetic relationship to WAC. But the
6	exemplified in your report, the	6	key issue here is the signal of what AWP
7	relationship between AWP and WAC in the	7	is for ASP.
8	real world is reflected in the	8	Now for a drug where WAC is
9	relationship of AWP to WAC in the but-for	9	20 percent below or 25 percent below, it
10	world? Correct?.	10	is not going to matter to me. I am still
11	A. That's correct.	11	going to be looking at what AWP is going
12	Q. Are you saying that just as statistical	12	to be relative to ASP and whether that AWP
13	artifact?	13	was a good signal for ASP.
14	A. I am saying that as a matter of business	14	And so for different companies,
15	practice. Drug manufacturers, since they	15	they might have 20 percent or 25 percent.
16	started making use of the pricing	16	That is not relevant. I am looking at
17	compendia, have listed and made use of	17	AWP. Since that since the third-party
18	list prices that include a wholesale	18	payers are reimbursing off AWP, I need to
19	price, a wholesale list price in the case	19	find out what the expectations, as Loucks
20	of BMS, or WAC in the case of other	20	says in the MacKenzie memorandum and
21	companies, and AWP, and they have	21	brief, that people didn't know how much
22	maintained relationships between those	22	how deep those discounts were. They
	587		589
1	prices, and sometimes they have changed	1	didn't know how far below AWP ASP really
2	slightly over time, but they have remained	2	was. And that's the key relationship.
3	fairly uniformly constant by manufacturer,	3	And I am looking for yardsticks for
4	and that those facts exist.	4	AWP/ASP.
5	Q. And those are facts that you take into	5	Q. I have been here listening to you.
6	account in creating the but-for world?	6	A. Okay.
7	Correct?	7	Q. I am trying not to make you say what I
8	A. In terms of creating the but-for world,	8	have heard you say several times before.
9	the fact that I take into account, that's	9	A. Then I am sorry. I am
10	a secondary fact.	10	Q. That is fine. I don't want to argue with
11	Q. But it turns out to be a fact in the	11	you.
12	but-for world that the relationship is	12	Where there is a WAC as well as
13	maintained?	13	an AWP, there is a measurement that the
14	A. For every drug that is that lists an	14	audience can use to look at the difference
15	AWP that is subject to the allegations in	15	between the two? Correct? It is just a
16	the conspiracy, it is irrelevant for the	16	matter of you can do arithmetic; right?
17	calculation of the injury and the damages	17	A. Yes. If
18	what WAC is.	18	Q. Where there is no WAC, that arithmetic
19	Q. Nothing happens by accident in arithmetic?	19	comparison is not possible? Right?
20	Will you give me that?	20	A. If if the Blue Book doesn't list WAC
1	a war as the second of the sec	1 2 1	and it is at lists on ANZO them you con

21 22

21

22

A. Well, no. But what I am trying to say is

that what we're getting at is there is a

and it just lists an AWP, then you can

either assume the math that you are

1	talking about, or you would have to look	1	there were expectations.
2	for it, but	2	Q. No, no, no. See, that's where I want
3	Q. Well, actually what you would assume is,	3	what I wanted to explore with you for as
4	and in fact what people do assume, is that	4	much time as I have remaining. Okay? I
5	there is no constant relationship between	5	understand that you can do arithmetic,
6	ASP and AWP for generic drugs? Correct?	6	too, and you can look at the actual
7	MR. SOBOL: Objection to the	7	selling price for drugs, or the OIG can,
8	form.	8	anybody can. It is just arithmetic. The
9	A. I'm not no.	9	actual selling price, the reimbursement
10	Q. How do you know?	10	rate, AWP, people can compare numbers all
11	A. Well, I have already seen surveys from the	11	over the place. I am now talking about
12	OIG that have related	12	subjective expectations. Expectation is
13	Q. No. Those relate reimbursement rates with	13	not arithmetic. An expectation is a
14	ASP?	14	prediction about the future, a projection,
15	A. No. They relate AWP to acquisition costs.	15	in somebody's mind.
16	Q. Yes. But any two numbers can be compared?	16	And the question I am asking you
17	A. Right.	17	is what reason you have to believe that
18	Q. Any two numbers? Right?	18	anyone had in mind when negotiating the
19	A. Right.	19	reimbursement rate for generics some view
20	Q. In fact the proverbial spurious	20	as to the relationship between AWP and
21	correlation is the standing of the	21	ASP.
22	St. Louis Cardinals and the price of rice	22	A. Let me, if I might, turn your attention

70 (Pages 594 to 597)

price, of prescription drugs was intended to represent the average price at which wholesalers sell drugs to physicians, pharmacies, and other customers."

And then she goes on to describe how that has changed.

7 Q. Right.

A. But what I am saying is that AWP for drugs, there is no distinction here 10 between branded and generic. That was interpreted by the market over time 11 starting with Medicare, statutory 12 enablements, and the use of various 13 pricing mechanisms and signals. 14

> AWP had a meaning for both branded and generic drugs, and it was taken to mean just what has been written -- what I read to you.

Q. But you keep --19

20 A. And that has changed over time. 21

(Mr. Wise exiting the deposition

room at 4:45 p.m.)

Q. I understand that somebody else had that opinion, and maybe that is your opinion, too. My question has to do with how you can discern what relationship was expected from actual arithmetic results. That is putting the cart before the horse. There is no way to know what was in somebody's mind by what they did, because as I think Mr. Edwards pointed out, you could have done the same thing for any number of reasons.

The fact that they -- in fact, don't you think it is curious -- tell me this. Don't you think it is curious that the signal is different depending upon who is receiving it? That for one class of drugs people expect AWP to be so many percent higher than acquisition cost, whereas other people have a different expectation? The manufacturer is putting one AWP, but different people interpret it differently. You don't think that is

curious?

MR. SOBOL: Objection to form. A. I don't think the yardsticks that we see reflect how drugs have been -- have been marketed, and in the past, and how the expectations of AWP reflected the whole array of prices below AWP in the 1980s, and once the allegation -- the alleged scheme began or was undertaken by defendants, one sees the spreads diverging differently for different types of drugs from the different yardsticks to begin with, and the divergence that I see in the actual spreads reflect exactly what I have described in attachment E, which is that the manufacturers would use this scheme, these price reductions, these price offsets, these incentive payments, to focus on particular groups that were able to move market share for their particular drugs. So if I am a big manufacturer of

595 I want to move market share of cytoxan 1

2 overall, well, I will, and most of the 3

NDCs are in injectable form or in

4 physician- administered form, what the, as

cytoxan and the docs are my main guys, and

5 a matter of economics you would expect

that the incentives would be channeled for 6

7 most of the units of that drug sold, and

8 the data is showing that the actual

9 spreads indeed comport and corroborate the

10 incentives that are the basis for the

allegations. 11

12 O. See, I think this is where we are seeing 13 things from two different points of view. If you were to do a study of the extent to 14 which good bargainers --15

MR. SOBOL: I am sorry?

Q. -- good bargainers, good bargainers, people who know how to negotiate, the extent to which they are able to negotiate discounts from MSRP, compared to people like me or Schleps, take your choice, there would be a difference. That

I have put forward declarations in support of class, and class has been certified, indicating that I could calculate but-for prices for the branded and the generic drugs absent the alleged violation, and I have implemented it for the Hytrin matter and the Terazosin matter.</li> <li>Q. And those cases involved a single product; correct? A single molecule?</li> <li>A. They did involve a single molecule.</li> <li>Q. The allegation in those cases, the alleged antitrust violation, was preventing the entry of a competitive generic into the</li> </ul>	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	was by looking at actual data based on when the generics came into the market? Correct?  A. That's correct.  Q. Let's turn to a different subject.  What percentage of sales of brand name drugs to retail pharmacies do you believe are subject to chargeback arrangements?  A. I may have I can't recall that number now. I have reviewed information like that, but I can't recall at this point.  Q. Is it a fairly significant number?  A. I really would be speculating.  Q. Small? Large?  A. You are asking me to speculate, and I don't do that.  Q. All right. And just so we understand, when we refer to a chargeback arrangement,

73 (Pages 606 to 609)

606 1 negotiated a price lower than what the 2 wholesaler pays with the ultimate 3 customer? A. That's correct. 4 Q. Are you familiar with the brand names

5 antitrust case? 6

A. I am. 7

8 Q. As a matter of fact, you were involved in that case assisting Professor Franks who 9 10 was the expert for the wholesalers?

11 Correct?

12 A. That is correct.

Q. And --13

14 A. I am trying to remember if it was for all 15 of the wholesalers or a subset, but let's 16 say a or the wholesalers.

Q. Would you agree with me the essential 17 18 premise in that case was that manufacturers and wholesalers had 19 20 conspired not to give discounts to retail 21 drugstores?

MR. SOBOL: Objection to the

1 reflect the relative bargaining power of 2 each party? 3

MR. SOBOL: Objection.

You may answer.

A. Are we talking about this market, or are we talking about any market?

Q. In general. In general. In this case specifically, but just as a general principle.

10 A. The -- one would have to take into account 11 more than just relative size or relative bargaining. You would need to know how 12

many buyers there were. You would need to know if there is 50 large buyers or one

15 large buyer and 50 small buyers.

16 O. But whether there were 50 or one would all go to either one side or the other's 17

relative bargaining power, wouldn't it?

A. That's right. I mean you would need to 19 20 understand - I thought you were asking about a single -- a single buyer's. I 21

mean you would need to know the context 22

22

1

2

3

6

7

8 9

10

11

17

A. The premise and the allegations and the subtleties of the findings have receded sufficiently in my memory that, you know, I wouldn't even want to start framing or responding to that.

The focus of the particular consulting I was doing was not looking so much at that as really focusing on the positions of the wholesalers and did they benefit from the conspiracy and what was their margins and --

12 13

Q. In connection with your work in this case, did you ever go back and look at the 14 15 allegations made in the brand name case and some of the pricing disparities that 16

the retail drugstores pointed to?

A. I have not reviewed the findings of that 18 19 case in that regard. No.

20 Q. Would you agree that the market clearing 21 price of a product sold by a manufacturer 22

to a particular buyer will ordinarily

1 overall.

2 Q. Sure. Because you would need to know how 3 many other buyers are out there, and that would go to determining in any particular 4 5 transaction how much bargaining power

6 existed on one side or the other?

7 Correct?

8 A. That could possibly have an effect.

9 Q. Would you agree with me that the average 10 selling price of brand name drugs to hospitals reflect a balance of bargaining 11 power between hospitals and manufacturers? 12 MR. SOBOL: Objection to the 13

form.

14 15 A. I would expect that the rebates and the discounts that are offered to any group of 16 17 purchasers if they have certain power or 18 certain information over drugs would 19 affect what those -- what those discounts 20 are -- those price offsets would be from

21 AWP.

22 Q. So whether it is hospitals, doctors, PBMs,

## 74 (Pages 610 to 613)

	610
1	mail order pharmacies, if we looked at the
2	average selling price for any one of those
3	entities, that would be reflective of the
4	balance of bargaining power between that
5	entity and a manufacturer of a brand name
6	drug?
7	MR. SOBOL: Objection to the
8	form.
9	A. It would certainly give us some

- information. 10
- 11 Q. Now in connection with your work in this case, have you looked at average selling 12 prices by category of purchasers? 13
- A. At -- to -- to this point, that -- that 14 analysis has been unnecessary.
- 15 Q. So just so we're clear, you have not 16 looked at the average selling price to 17 retail pharmacies as compared to the 18 average selling price to mail order 19 pharmacies as compared to the average 20
- selling price to hospitals? 21
- A. I have some notion of and have looked at 22

1 cytoxan?

- 2 A. I have -- I am not at that stage yet. I 3 have just done illustrative calculations.
  - O. Would it be fair that you have not systematically looked at average selling prices within a particular group of like buyers compared to other different groups of buyers --

MR. SOBOL: Objection to the form.

Q. -- such as hospitals compared to retail 11 pharmacies compared to PBMs compared to 12 mail order? 13

> MR. SOBOL: Objection to form. You may answer.

- A. I, to date, I have not been able to notice sufficiently complete 30(b)(6) depositions that I could fully calculate the average sale prices to those groups without more information from each of the defendants.
- O. You raise an interesting subject. You have not calculated average selling prices

that in the past, and the measure to which 1 2 I am looking to now is the average of 3 those averages.

4 Q. But you have not determined particular 5 average selling prices within a particular category of purchasers and compared those 6 to other categories of purchasers? 7

8 Correct?

- 9 A. I have certainly looked at differential price offsets paid to different groups, 10 which is the flip side of what you are 11 getting at. So, for example, in cytoxan, 12 because I am proceeding by NDC, and 13 because I am looking at measures of 14 spreads, the fact that I am seeing much 15 different spreads to one group, i.e., the 16 physicians, relative to those sold through 17 PBMs, they are -- they are quite 18
- 19 different, which tells me something about 20 the price offsets and which tells me
- something about the relative ASPs. 21
- O. Have you done it for drugs other than 22

613 for my client Johnson & Johnson. Is that 1 2 correct?

MR. SOBOL: Objection.

- A. As of the writing of this declaration, I did -- I had received -- I would have to check precisely. I know I had received data from two defendants, and either there was some either contamination of the files or some missing data that made it impossible for me to do illustrative calculations for J & J and for GSK.
- 12 O. Did you attempt to do any for any Johnson & Johnson products? 13 14

MR. SOBOL: Objection to the form. It assumes he had the data to do

A. I asked my staff to take the data that we had received and take it to a point where I could do some comparisons similar to what has been put forward -- have been put forward in tables 2 and 3 in the declaration, and I was told that there was
